

ANTI-SEIZE 2000[®]

is the product trade name of RITEC INDUSTRIAL PRODUCTS[®] Atlanta Georgia, USA

Description:

Anti-Seize 2000[®] is a **Extreme High Temperature and Extreme Pressure Anti-Seize Lubricant and Sealant** for all threaded parts and gaskets.

Application:

Anti-Seize 2000[®] is designed for use in metalworking, automotive, marine, aircraft, and other industries for a variety of applications. **Anti-Seize 2000[®]** is excellent for use on equipment, engines, exhaust systems, boilers, heat exchangers, tug boats and barges, bilge pumps, anchor winches, pump shafts, pipes and gaskets etc.

Major Users:

Anti-Seize 2000[®] is used extensively by Dairies, Hotels, Industrial Plants, Motels, Office Buildings, Supermarkets, Automotive Repair, Car Washes, Construction, Outboard Motors, Refineries, Chemical Industries, Farms, Marine.

Features & Benefits:

- Anti-Seize 2000[®] ...** Prevents Seizing. Its unique formula contains a high level of copper. The function of copper is the static lubrication at temperatures as high as 2000[°]F (1093[°]C).
- **Anti-Seize 2000[®] ...** Contains a micronized metalized extreme pressure additive that gives **Anti-Seize 2000[®]** tremendous film strength which allows threaded parts to go on tighter and come off easier.
- **Anti-Seize 2000[®] ...** Seals out moisture to protect against costly corrosion damage. It is effective even under saltwater spray conditions.
- **Anti-Seize 2000[®] ...** Is harmless to metal and synthetic rubber parts. It also replaces white lead in sweat fittings.

Instructions/Dosage:

Shake vigorously before using. For best results, metal surface should be above 65[°]F (18[°]C) and free of dirt, grease and oil.
